FEATURES

e

REAL-TIME MENU MANAGEMENT
Experience maximum efficiency and profitability with our Point of Sale (POS) and dashboard enabled menu creation system. This powerful tool allows you to effortlessly customize multiple menus as needed, ideal for varying times of the day, special occasions, and happy hours.

WORKS OFFLINE
Restaurants need not cease operations when the internet falters. With offline mode, orders can be collected, dispatched to kitchen display systems and printers in real-time, and payments made swiftly and securely.

> eatOS's ai-powered point-of-sale ecosystem, built specifically for restaurants with the objective of simplifying restaurant management and augmenting the dining experience for both guests and operators, thereby simplifying repetitive tasks with insightful data.

ai enabled

ORDER AND PAY AT TABLE
Say goodbye to long queues for ordering and checkout. Equip employees with the power to accept payments at the table, or enable customers to pay from their own devices – enhancing efficiency and transforming the customer experience.
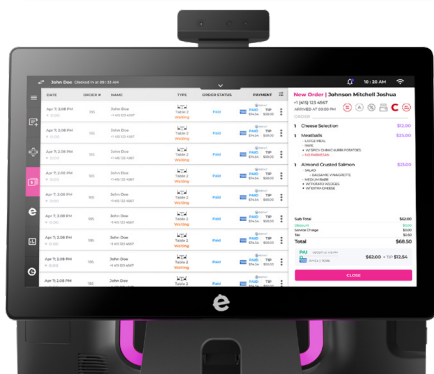

TABLE MANAGEMENT
Optimize service delivery with custom floor plans and multiple service areas. Monitor table turnover times to gain valuable insights that improve overall efficiency. Streamline the dining experience by enabling guests to order and pay directly via their smartphone.

BUILT-IN ONLINE ORDERING
Eliminate the hassle of manually tracking online and third-party app orders with an integrated POS and KDS system. Enjoy seamless data collaboration and gain efficiency in accounting operations with near real-time updates.
