

# SELF-SERVICE KIOSK

Embrace the future with a self-service kiosk, an effective strategy to reduce labour expenses, expedite customer service, and bolster profitability. Our self-service kiosk solution is specifically designed for the restaurant industry, featuring a user-friendly interface that integrates seamlessly with the point of sale and kitchen display systems, thereby reinforcing operational efficiency.

Intuitive Experience

Reduce Labor Costs

Increase Average Check Size

Reduce Wait Times

Direct Integration to Kitchen

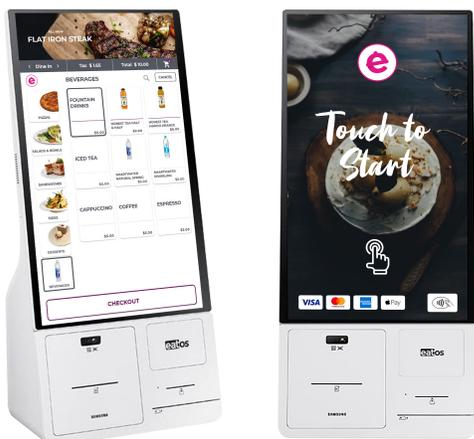

Durable Hardware

# FEATURES

## INCREASE AVERAGE CHECK SIZE

Our user-friendly algorithm is designed to make dining decisions effortless. Utilising historical data, it provides personalised menu suggestions that perfectly align with customer preferences. With just a few clicks, you'll have a customised selection tailored to your exact cravings.

## REDUCE WAIT TIMES

Minimising wait times and queues allows clients to experience swift service and increased profitability. This, in turn, boosts employee efficiency, enabling them to prioritise the crucial tasks of back-end operations and client satisfaction.

## REDUCE COSTS

Streamline your operations and reduce overheads with a self-service ordering system. Our intuitive software simplifies the process for customers, enabling them to place their orders quickly and effortlessly.

## DIRECT INTEGRATION

Seamlessly integrates with a range of Point of Sale and Kitchen Display Systems, delivering a fast and effortless self-ordering experience for customers.

eatOS's AI-powered Point of Sale ecosystem, built specifically for restaurants with the objective of simplifying restaurant management and enhancing the dining experience for both guests and operators, thereby automating repetitive tasks with insightful data.
