

POINT OF PURCHASE

Experience next-generation efficiency with our all-encompassing handheld restaurant management system. This compact, palm-sized solution encapsulates the full capabilities of a conventional Point of Sale system. Designed with an inherent focus on ease of use, it facilitates proficient order-taking, along with both EMV and contactless payment options, ensuring uninterrupted operation for your restaurant, regardless of online or offline status. Harness the potential of innovation tailored to suit the demands of the modern food service industry.

FEATURES

SAVE COSTS, POWERFUL FEATURES

Dispel the costly and labour-intensive legacy Point of Sale systems. Introducing an affordable yet feature-rich handheld solution, built for ultimate convenience with effortless integration into existing infrastructure.

TABLE MANAGEMENT

Take charge of the guest experience with our handheld ordering system. Capture orders quickly and accurately to reduce table turn time and increase profitability. Delight your customers with hassle-free service and reliable results.

FREEDOM OF PAYMENT OPTIONS

Give your guests the power to customise their orders by selecting ingredients, sides, and more straight from their own handheld device. Our unparalleled technology allows for payment through tap, swipe, or dip, as well as electronic and paper receipts, ensuring an effortless payment process.

REAL-TIME MENUSYNC™

Take charge of the guest experience with our handheld ordering system. Capture orders quickly and accurately to reduce table turn time and increase profitability. Delight your customers with hassle-free service and reliable results.

POWERFUL COMPATIBILITY

Easily integrate your restaurant operations with eatOS's comprehensive ecosystem, encompassing Point of Sale, kitchen display system, receipt printers, cash drawers, and more. No matter the size of your restaurant, our intuitive platform guarantees a streamlined experience.

eatOS's AI-powered Point of Sale technology cloud, built specifically for restaurants, aims to simplify restaurant management and enhance the dining experience for both guests and operators. By automating repetitive tasks with insightful data, it streamlines operations and boosts overall efficiency.
