FEATURES

REPORTING AND ANALYTICS

Unearth actionable intelligence with our sophisticated analytics engine. Construct finely-tuned reports with data points tailored to your exact requirements, then streamline the delivery of these insights with API links, emails, SMS messages, and in-app notifications.

CLOUD REPORTS

Gain unparalleled access to real-time POS, dashboard, and analytics data from any device. Streamline processes for optimal efficiency and profitability, freeing up valuable hours for management.

MULTI-LOCATION REPORTING

Obtain a detailed analysis of every location, or gain insight into multiple sites at once. Utilise the extensive filters to tailor the data, granting only authorised personnel access to sensitive information.

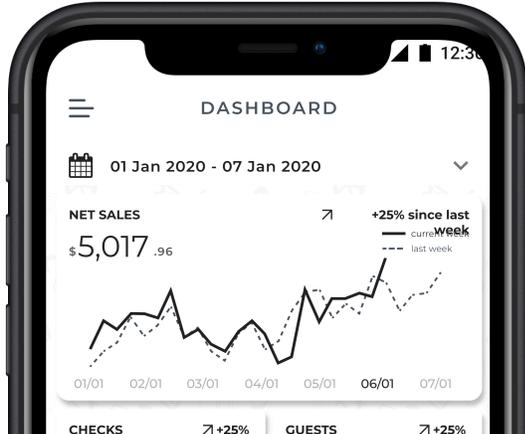

PRACTICAL INSIGHTS

Gain insights in real time with evidence-based data that reveals cost-saving opportunities, optimises operational efficiency, and advances business outcomes and consumer satisfaction.

REAL-TIME DATA

Accomplish your objectives expediently by harnessing real-time insights and making informed decisions based on data that is ripe for action.
